10. Bad effects of smoking.

Part A – Reading Test (Marks-50)

Read the passage and answer the questions below:

Having knowledge, skills and good attitudes, a good citizen can render many good works in his society. Knowledge, skills and positive attitudes are always present in a modern person in the present world but a backward individual may lack any one of these. In the first state, a person needs knowledge as today's society is mainly based on knowledge of contemporary sciences, technologies and other essential subjects. A man faces different problems in leading a smart life. A good individual should have also knowledge about his country, geography, people, executive power, judicial culture, tradition, literature, moral values, religions and socio-economic and education systems. Knowledge about all these things will make a man a very good citizen. Secondly, an updated person has not only knowledge but also skills to apply the knowledge to do things practically. For example, if a person knows many things about computer but cannot browse internet on computer, his knowledge is not followed by skills. Skill is such an ability that enables a person to do something in reality. The difference between knowledge and skill is that knowledge is theoretical but skill is practical. As a result of having knowledge and skill, man attains a very good attitude to other in the society as these make him a civilized individual. A person's positive attitudes can change his behavior. A man's behavior with others shows his attitudes to those people. In a society, people have to learn how to do group work. Group work is very important as it teaches them how to develop attitudes of mixing with others. As a result of group work, people's shyness disappears, and they learn how to help others. Group work also teaches people how to behave in a democratic way. In fact, group work brings about a great change in a person's overall life. Students should learn how to work in a group inside the classroom and this will help them in their real life. So, a man has to acquire knowledge and skills so that he can live a good life in the society.
